

Application Requirements for the Fund for the Advancement of Women, Mission 21

- The Fund for the Advancement of Women seeks to promote the visibility of the work on gender equality and justice carried out by Mission 21 partner organisations, in particular those efforts linked to the Sustainable Development Objective No. 5: “Achieve gender equality and empower all women and girls.”
- The application is part of the efforts to strengthen networks and develop skills, with a special focus on the programme’s strategic lines: gender mainstreaming; political advocacy for women's rights; and support for the empowerment of women and girls.
- Applications for this fund come from Mission 21 partner organisations, and must be compatible with the objectives of the cooperation programme in the corresponding country/continent.
- It is highly recommended that at least two partner organisations participate in the design and implementation of the project, and that the target community or communities be included in the design, execution, and evaluation of the project. Projects that contribute to extend synergies, cooperation efforts, and networks will take preference in the selection process. The application must have one responsible organisation.
- The amount is transferred directly to the partner organisation responsible for the project. The financial and narrative report is the responsibility of the partner organisation within the framework of the cooperation programme, and is due at the time of the regular submission deadline for annual reports.
- Requests must not exceed USD 10.000 per project. Please take this amount in USD as a general guideline and indicate, when possible, the amount in the local currency. Postulants may apply for the maximum amount or a partial amount.
- The application can be submitted in the following languages: Spanish, English, or French.
- The application deadline for the projects and the selection of the projects is overseen by the Women and Gender Desk of Mission 21 in conjunction with the corresponding Programme Officer.
